Right to Know Forum

On **October 24, 2006**, the New Jersey Department of Health and Senior Services (NJDHSS) and the New Jersey Department of Environmental Protection (NJDEP) are holding a Forum to discuss issues related to the Worker and Community Right to Know Act and current events.

Mr. Olsen and Mr. Rothermel, from the Solid Waste Program at the Monmouth County Health Department, will discuss their recent compliance assistance project that helped school officials identify the proper procedures for use, storage, and disposal of the hazardous chemicals in school laboratories.

Mr. Schill will discuss Legionnaires' Disease and the characteristics of the Legionella bacterium in water systems, including its growth, transmission, identification, and remediation. He will provide a history of outbreaks and investigations in New Jersey and the methods employed to characterize environmental contamination, perform remediation of contaminated water systems, and maintain systems free from contamination.

The Right to Know Programs in the NJDHSS and NJDEP will provide activity updates and will give an update on PEOSH Program activities.

You should attend if you are a public employee, private employee, health and safety professional, industrial hygienist, public employer, covered private employer, trainer, consultant, emergency responder, or environmentalist.

The Public Health Council has approved this conference for **3 CEs** (continuing education contact hours) towards renewal of a New Jersey Health Officer or Registered Environmental Health Specialist license.

If you would like to attend, please fill out the registration form. There is no registration fee, but **pre-registration is required**. There are only 175 seats available, so please register early. The deadline for pre-registration is October 17, 2006. You also may register on-line at www.state.nj.us/health/eoh/rtkweb/rtkforum.htm
